

STOP THE CLOT, SPREAD THE WORD®

Cancer and some cancer treatments can increase the risk for blood clots

If you have cancer or are being treated for cancer, it is important to know the signs and symptoms of blood clots.

Contact your cancer doctor if you experience any of these signs or symptoms of a blood clot.

Signs and symptoms of a blood clot in a person's leg or arm may include

Swelling

Pain or tenderness
not caused by injury

Skin that is warm
to the touch

Redness or discoloration
of the skin

Seek immediate medical attention if you experience any of these signs or symptoms of a blood clot.

Signs and symptoms of a blood clot in a person's lung may include

Difficulty
breathing

Chest pain that worsens with
a deep breath or cough

Coughing up blood

Faster than normal or
irregular heartbeat
