Heading to the Hospital? Get Better. Don't Get a Blood Clot.	08/10/16	1	5,000	16,800	\$533.61

5,000 **16,800**

Placements to date: 1

The equivalent ad value of placement(s) is: \$533

The numbers presented in this report are based on the following widely-accepted industry standards:

Circulation and Readership: Circulation figures represent a combination of those conveyed by BurellesLuce, Audit Bureau of Circulations and Allen's and Nova clipping services. "Readership" numbers are based on the newspaper industry's own recent research showing on average that each copy of a newspaper is read by 3.36 readers. (National Newspaper Association Readership Study 2010)

Online ad equivalency is calculated using research by the Newspaper Association of America in partnership with Mignon Media Research.

Placements: One print clip or one web placement is equal to one total placement.

Newspaper Chains: When several "chain" newspapers are published at the same location, usually only a small amount of the copy changes from paper to paper to "localize" each one. If we receive a clipping from one of those papers, it is assumed that the clip was also published in all the other papers of that chain.
