

Preview of Awareness Banner:

If you have been diagnosed with cancer, getting well is your top priority.

stoptheclot.org/spreadtheword

Cancer and some of its treatments increase a person's risk for dangerous blood clots, a leading cause of death among people with cancer.

stoptheclot.org/spreadtheword

Blood clots affect 900,000 people a year. 1 in 5 blood clots are due to cancer and some of its treatments. When caught early, many blood clots can be treated.
